Verified First try to adjust the location and positioning of the router to improve the signal. If that fails it's often possible to change the wireless channel of your router. There is a chance that other wireless devices are using the same wireless channel, which can result in decreased signal strength. This was helpful (1088) What is the difference between a router and a modem? Verified A modem facilitates the connection to the internet through your provider. A router distributes this signal to different devices within a network. Most modern routers have a built-in modem. This was helpful (91)
